SUMMARY

Recent Computer Programming and Analysis graduate with enterprise co-op experience building secure, scalable, and accessible applications using **Java, Spring Boot, JavaScript, TypeScript, Angular, React, Node.js, REST APIs, SQL/NoSQL databases, Docker, Azure, Git, Azure DevOps, and GitHub Actions**. Strong foundation in **API implementation, microservices, Swagger/OpenAPI, SOAP, JWT authentication, Redis caching, CI/CD, Agile delivery, reusable components, and production-ready software development**.
Target Roles: Junior Developer | Java / Angular Developer | Cloud API Developer

EDUCATION

Bachelor of Computer Applications | Manipal University, Jaipur, India Aug 2026 – Present
Advanced Diploma (3.2 GPA) | Computer Programming and Analysis | Seneca Polytechnic, Toronto, ON May 2023 – Apr 2026

WORK EXPERIENCE

Software Developer Co-op | Ontario Ministry (MPBSDP) | Toronto, ON May 2025 – December 2025

- Contributed to **My Benefits**, a large-scale public-sector web application, using **Angular, TypeScript, JavaScript, HTML, CSS, REST APIs, Azure DevOps, SonarQube, and OWASP ZAP** to support secure digital services.
- Participated in the full **software development lifecycle**, including requirements analysis, UI/API implementation, debugging, testing, documentation, code-quality improvements, and deployment support.
- Built reusable frontend components, integrated workflows with backend **REST APIs**, and collaborated with developers, QA, designers, and stakeholders in an **Agile/Scrum** environment.
- Improved application quality by increasing **test coverage by 80%**, resolving **SonarQube** issues, supporting peer reviews, and contributing to a **25% maintainability improvement**.
- Supported **REST API troubleshooting, interface validation, testing results, Git-based code changes, and documentation updates**, strengthening skills in **API specifications, reusable code, Agile delivery, and production application support**.

Junior Developer | Seneca Software Developer Club | Toronto, ON October 2024 – December 2024

- Built a backend API platform using **Java, Spring Boot, RESTful APIs, Swagger/OpenAPI documentation, JWT authentication, MySQL, Docker, and JUnit testing**. Implemented layered architecture with controllers, services, repositories, DTOs, validation, exception handling, reusable code structure, and API documentation to practice enterprise-style backend development.

KEY PROJECTS

My Benefits Platform | *Angular, TypeScript, REST APIs, Azure, WCAG*

- Enhanced production-facing UI components and **REST API integrations** for a government digital services platform, supporting accessibility, maintainability, secure development, debugging, testing, documentation, Agile delivery, Git-based collaboration, and production-support readiness.

Hamdel (Healthcare Marketplace Platform) | *React, TypeScript, Node.js, Express, Prisma, PostgreSQL, Supabase, Docker*

- Built a full-stack healthcare platform with profile workflows, scheduling, messaging, payments, notifications, and admin review using **React, TypeScript, Node.js, Express.js, Prisma, PostgreSQL, Redis, Docker, and Tailwind CSS**. Developed **80+ REST endpoints** across **18 route modules**, backed by **23 Prisma models** and **16 migrations**, with API validation, structured routing, database modeling, and service-oriented backend design.

Fragments Microservice | *Node.js, Express.js, AWS S3, DynamoDB, Cognito, Docker, GitHub Actions, REST APIs*

- Built a cloud-based microservice for authenticated fragment creation, storage, retrieval, deletion, and conversion using **Node.js, Express.js, Docker, AWS S3, DynamoDB, Cognito, and REST APIs**. Added **Jest/Hurl testing**, image conversion with **Sharp**, Docker-based local development, debugging, documentation, and CI/CD workflows using **GitHub Actions**.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Node.js, Python, C++, C

Frontend: Angular, React, Next.js, HTML5, CSS3, SASS, Tailwind CSS, Bootstrap

Backend & APIs: Spring Boot, Express.js, REST APIs, Swagger/OpenAPI, SOAP, GraphQL, JWT, Prisma ORM

Cloud & DevOps: Azure, Docker, Kubernetes, AWS EC2, AWS S3, AWS DynamoDB, GitHub Actions, Azure DevOps, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, SQLite, DynamoDB, Supabase, Redis

Testing & Quality: JUnit, Jest, Hurl, Postman, Thunder Client, SonarQube, OWASP ZAP

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Figma, Linux, Windows, Sharp, SendGrid
