SUMMARY

Recent Computer Programming and Analysis graduate with enterprise co-op experience building secure, scalable, and accessible public-sector applications. Skilled in Angular, TypeScript, REST APIs, Azure DevOps, and full-stack development, with a strong foundation in data structures, systems analysis, cloud computing, and AI-powered solutions.

Target Role: Software Developer | Full Stack | Cloud & AI

EDUCATION

Advanced Diploma (3.2 GPA) | Computer Programming and Analysis | Seneca Polytechnic, Toronto, ON May 2023 – Apr 2026

WORK EXPERIENCE

Software Developer Co-op | Ontario Ministry (MPBSDP) | Toronto, ON May 2025 – December 2025

- Contributed to the development of a large-scale public-sector web application (My Benefits) using **Angular, TypeScript, HTML, CSS, and REST APIs**, serving Ontario residents.
- Improved application quality by increasing **test coverage by 80%** and resolving **SonarQube-reported issues, improving maintainability by 25%**.
- Strengthened application security and reliability by assisting with **OWASP ZAP testing**, helping reduce reported vulnerabilities by **20%**, and supporting **CI/CD workflows** in Azure DevOps.
- Evaluated detailed UI designs to ensure alignment with **functional and non-functional requirements**, including **accessibility standards**.

Junior Developer | Seneca Software Developer Club | Toronto, ON October 2024 – December 2024

- Collaborated cross-functionally with a team of **10+** members to Deliver **5+** major website feature upgrades utilizing **TypeScript, JavaScript, CSS, REST APIs**, and databases including **MongoDB** and **MySQL**.
- Contributed to club events** by leading workshops on **React.js, TypeScript**, and **API integration**, fostering a learning environment and improving member skillsets, boosting club attendance by **40%**.

KEY PROJECTS

My Benefits Platform | Angular, TypeScript, REST APIs, Azure, WCAG [My Benefits](#)

- Enhanced core UI components and **API integrations** for a government web platform, improving **WCAG accessibility** compliance by **30%**, increasing maintainability by **80%** through code-quality improvements, and supporting security testing that helped lower vulnerabilities by **20%**.

Hamdel (Healthcare Marketplace Platform) | React, TypeScript, Node.js, Express, Prisma, PostgreSQL, Supabase, Docker, Vite, Tailwind [GitHub](#)

- Built a full-stack platform for patients and caregivers with profile completion (**KYC, certifications, background checks**), **scheduling/availability, messaging, payments, notifications, and admin** review workflows delivered **80+ REST endpoints** across **18 route modules**, backed by a normalized Prisma schema (23 models) and **16 database migrations**.

AI Tooling Suite (LLM Apps, Agents, Search) | OpenRouter (OpenAI SDK), Zod, Tavily, Hono, Sharp [AI tooling Suite](#)

- Implemented **embeddings-based** semantic product search and a screenshot-driven visual debugging assistant that can optionally use web search to ground fixes. Built a **source credibility analyzer agent** (URL reading + corroboration → report) and a tested Data URI utility library with runtime validation.

TECHNICAL SKILLS

Programming Languages	JavaScript, React, Python, Java, TypeScript, C, C++
Web Development & APIs	HTML5, CSS3, SASS/LESS, React DOM, Angular, SPAs, Bootstrap, REST
AI / Machine Learning / LLM Engineering	Agent-Based Systems, Tool Calling, Structured Outputs, RAG Concepts, Embeddings-Based Search, OpenAI SDK, Tavily, AI Evaluation & Grounding
Databases	MongoDB, MySQL, ER Modeling, Data Management, supabase
Cloud Technologies	AWS (OAuth, EC2, S3, DynamoDB), Microsoft Azure
Testing & API Tools	Postman, Selenium, Thunder Client, SonarQube, OWASP ZAP
Other Tools	Git, GitHub, OpenAI SDK (OpenRouter), Zod, Tavily, Sharp, Netlify, Vercel
